Vehicle Wrap Maintenance

design | service | solutions

Signs Now uses the highest quality graphic film in the industry for a full one year warranty. The more you care for your vehicle graphics, the better it will look and last. The warranty is prorated so we recommend you review the following suggestions for maintenance for your Signs Now vehicle graphics.

1. **Car/Truck Wash** - High pressure water can cause the wrap to fail so for this reason we recommend hand washing with mild soap.
2. **Pressure Wash** - When we install graphics on a vehicle we always overlap each panel from back to front which helps to prevent the vinyl from peeling back while driving highway speeds. This also helps occasional contact with brush and branches from doing the same. If you pressure wash, you stand an excellent chance of hydraulically lifting the vinyl at the seams. DO NOT PRESSURE WASH YOUR WINDOW PERF or you will rip it apart.
3. **Wax** - We highly recommend that you wax your vehicle once a year (or more) to maintain the high shine and the life of the vehicle graphics. The best wax to use is a liquid wax which makes it easier to apply. In most cases, wax will take out any stains that may get in the graphics.
4. **Snow Removal** - Only use a brush, never use a scraper as this could damage the film. If you wax the film (the solid film not the window perf), snow should just come off with very little effort.
5. **Window Wipers** - DO NOT EVER USE THE REAR WINDOW WIPERS ON THE WINDOW FILM! If you do this will void the warranty and damage the film.
6. **High Heat** - If your vehicle is exposed to the sun and gets very hot, the film will not fall off or peel. The film loves the heat. However, ultraviolet rays will cause fading over time.
7. **Insurance** - Most insurance companies offer a special policy to cover your vehicle graphics. Call your insurance agent for more details.
8. **Peeling or Lifting** - If you see the film lifting or peeling back, please contact us immediately so we can fix the problem. Not doing so will prevent us from the ability to fix the problem and void the warranty.
